

# Key Information Document

## Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

## Product

**Product name:** NOVIS "Life Savings Plan", GTC-17191207, NOVIS Fixed Income Insurance Fund, regular premium, currency: Euro

**Manufacturer:** NOVIS Insurance Company, NOVIS Versicherungsgesellschaft, NOVIS Compagnia di Assicurazioni, NOVIS Poist'ovňa a.s., Námestie Ľudovíta Štúra 2, 811 02 Bratislava (Slovakia), [www.novis.eu](http://www.novis.eu)

**Contact:** Call +421 904 165 181 for more information

**Supervisory authority:** Národná banka Slovenska (National Bank of Slovakia), Imricha Karvaša 1, 813 25 Bratislava (Slovakia)

**Date of production of the KID:** 29/10/2021

**You are about to purchase a product that is not simple and may be difficult to understand.**

## What is this product?

### Type

NOVIS "Life Savings Plan" is life insurance connected with investing into own funds of Insurer based on section 64 point 6 of Slovak insurance law. Own fund of Insurer is portfolio of assets owned by Insurer specially allocated to cover the liabilities in life insurance for selected group of contracts. The insurance contract is governed by the Icelandic contractual law. This document is prepared for investing into NOVIS Fixed Income Insurance Fund (hereinafter „Fund“).

### Objectives

The objective of the product is to provide insurance benefits to the policyholder or other insured persons, potentially allowing for capital growth through the included investment options. Investment objective of the Fund is to increase the value of investment over the level of inflation in long term by investing directly or indirectly into government and corporate bonds with fixed interest, which forms majority of investments, while debt securities with floating interest may have minor share. Fund can also invest into non-investment grade bonds as long as there is favourable ratio between expected yield and related risk. In order to provide the necessary liquidity, the Fund may invest to a limited extent (up to 20%) in bank deposits with banks located in countries of the European Economic Area. Assets other than bonds, bank deposits and other monetary instruments may form maximum 20% of Fund portfolio. It is expected although not guaranteed, that this Fund shall experience lower volatility and relatively stable positive performance. Fund invests across the sectors of economy and without geographical limitations. The structure of the portfolio is not fixed but may change over time depending on market conditions. The income and revenues of the Fund are fully reinvested and are not intended to pay dividends. The return on investment and the value of the investment are largely dependent on the development of the underlying assets, and there is a direct relationship between the return on investment and the performance of the Fund. The Fund is denominated in EUR, but the underlying assets may be denominated in other currencies, which implies that the yield in the Fund is influenced not only by the performance of the assets, but also by the currency exchange rates. Currency risk is not hedged. The Fund does not provide any yield guarantee or return on invested funds. The Fund does not monitor or copy any index and does not have a benchmark. Detailed information is included in the individual Statute of this Fund and on our website <https://www.novis.eu/is/novis-funds>.

### Intended Retail Investor

Product is aimed at clients who are interested in life insurance and who are at the same time interested in investing, while their goal is to evaluate invested resources in long term (minimum recommended period for investment is 20 years). The client to whom product is addressed is supposed to be able to support a long-term financial burden related to regular premium payments. Fund is designed for clients with at least basic general knowledge or experience with investments and at least basic knowledge or experience with investments into bonds or bond funds, whose investment objective is to achieve return of investment over the level of inflation in long term and who are willing to accept low fluctuation of value of investment over time and have limited ability to bear investment losses.

### Insurance benefits and costs

The product includes insurance coverage in case of death for at least one of the insured persons. The insurance benefit in case of death of the insured person is the insured sum agreed in the contract (from the 11th year of the duration of the insurance contract, the agreed insured sums are annually decreased by 10 % of the insured sum of the previous year. Despite this rule, the insured sums can not fall below 5,000 €). In the event of the policyholder's death, the current value of the insurance account (investment) is also paid. Beneficiaries designated by you are the beneficiaries of the insurance benefit or, if you do not designate the beneficiaries, they are stipulated by law. If you reach the end of the agreed insurance period, you will be paid the current value of the insurance account (investment). According to conditions in the General Terms and Conditions, a NOVIS Loyalty Bonus is credited to the insurance account (in the amount of 6,000 €) and is the part of the value of the insurance account in the event of the policyholder's death. In addition to the death coverage, there are optional supplementary insurance coverages (in case of disability and critical illnesses), which can be agreed in the insurance contract. The insurance contract includes the possibility to request a payment of a part or of the whole value of the insurance account in the form of a pension. This document does not apply to supplementary insurance coverage agreed under this product. The price of insurance coverage is deducted monthly from the value of the insurance account in the form of deductions based on the sum insured, age, health, employment, sport or other activities of the insured person. The impact of insurance deductions and other insurance contract costs is set out in "What are the Costs?". For more details on the calculation of deductions for the insurance coverage, insurance coverage, situations where claims may be reduced or denied (exclusions, waiting periods), as well as the methods of calculating the values of insurance benefits, see the General Terms and Conditions.

The model example in this document is based on one insured person at the age of 35 (at the time of the conclusion of the insurance contract), without health problems and indicators of unhealthy lifestyle, without carrying out risky occupations or risky activities, with the insurance coverage in case of death 20,000 € and duration of the insurance contract of 20 years, with a total of 20 yearly premium payments of regular paid premiums (investments) of 1,000 € per year and 20,000 € in total. The risk premium for the insurance coverage in case of death is independent of sex and varies according to the age of the insured person. It represents a total of 607.86 €, which is an average of 30.39 € per year and corresponds to 3.04% of the investment. The resulting reduction in investment return at maturity after 20 years is 0.29% per year. This reduction in yield due to deductions for death coverage is already reflected in the yield data. The annual investment net of the average risk premium is 969.61 €. The "What are the risks and what could I get?" section provides data based on the parameters in this model example.

### Duration

The insurance contract may be concluded for an indefinite period of time, unless agreed otherwise in the insurance contract. If the contract is concluded for a definite period, the end of the insurance period is also the day of maturity of the product. The period of obligation to pay for fixed-term contracts is the same as the period for which the insurance contract is agreed. If the insurance contract is concluded for an indefinite period, the product has no fixed maturity. In the case of contracts for an indefinite period, the obligation to pay the regular premium is up to the age of 70, but at least 20 years.

In violation of the obligation to answer truthfully and completely to our written questions, we may withdraw from the contract if we did not conclude the contract with true answers. Due to a breach of the same obligation, we may limit our liability partly or in full, to pay declared claims.

The insurance contract shall automatically terminate by failure to pay agreed premium following final notice of the insurer of non-payments of premium; failure to pay premiums for the next insurance period within fourteen days of receiving the notice for payment; in the event of your death (if the policyholder is not the insured party based on the insurance contract, the insured person will become the new policyholder, if this is agreed with us); if the insurance has changed to paid-up policy status and the units kept in the insurance account will not be sufficient to cover the deductions (the product will expire on the last day of the second month following the month in which the value of the insurance account is not sufficient for the first time).

## What are the risks and what could I get in return?

### Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 2 out of 7, which is a low risk class. This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact the capacity to pay you.

**Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.**

Information regarding costs applicable in case of early cancellation of the contract is included in the section "How long should I hold it and can I take money out early?".

This product does not include any protection from future market performance so you could lose some or all of your investment.

If NOVIS Insurance Company, NOVIS Versicherungsgesellschaft, NOVIS Compagnia di Assicurazioni, NOVIS Poistovňa a.s. is not able to pay you what is owed, you could lose your entire investment.

### Performance scenarios

Market developments in the future cannot be accurately predicted. The scenarios shown are only an indication of some of the possible outcomes based on recent returns.

Investment 1,000 € per year Average yearly risk premium 30.39 € Survival Scenarios		1 year	10 years	20 years (Recommended holding period)
<b>Stress scenario</b>	What you might get back after costs (€)	0.00	6,403.71	15,353.59
	Average return each year (%)	-100.00%	-8.30%	-2.59%
<b>Unfavourable scenario</b>	What you might get back after costs (€)	0.00	7,299.08	19,636.35
	Average return each year (%)	-100.00%	-5.82%	-0.18%
<b>Moderate scenario</b>	What you might get back after costs (€)	0.00	7,712.03	21,024.61
	Average return each year (%)	-100.00%	-4.79%	0.47%
<b>Favourable scenario</b>	What you might get back after costs (€)	0.00	8,162.23	22,581.52
	Average return each year (%)	-100.00%	-3.73%	1.14%
<b>Accumulated invested amount (€)</b>		1,000.00	10,000.00	20,000.00

Death Scenario		1 year	10 years	20 years (Recommended holding period)
<b>Death of Policyholder</b>	What your beneficiary might get back after costs (€)	26,566.92	33,950.55	31,998.17
<b>Accumulated risk premium (€)</b>		15.12	236.16	607.86

This table shows the money you could get back over the next 20 years, under different scenarios, assuming that you invest 1,000 € per year.

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products.

The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment/product.

The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your adviser or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

### What happens if NOVIS Insurance Company, NOVIS Versicherungsgesellschaft, NOVIS Compagnia di Assicurazioni, NOVIS Poistovňa a.s. is unable to pay out?

The insurance company's liabilities resulting from insurance activities, including insurance benefits under the insurance contract, are not covered by the consumer protection scheme in case of insolvency of the Insurer. The Insurer is a joint stock company under the Slovak law and is subject to insurance supervision by the National Bank of Slovakia and has to meet the solvency and capital requirements under the Slovak Insurance Act, which is valid for the Insurer. In the event of insolvency of the Insurer, all claims of policyholders must first be fulfilled, and only then other claims can be fulfilled. Therefore, the assets held to cover technical reserves are fully available to cover insurance claims. There is no guarantee that this procedure will result in a 100% fulfilment of all insurance claims. It is possible that the policyholder can experience a total financial loss if the assets are not sufficient to meet the demands of all clients.

### What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for three different holding periods. They include potential early exit penalties. The figures assume you invest 1,000 € each year. The figures are estimates and may change in the future.

### Costs over Time

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Investment 1,000 € per year			
Scenarios	If you cash in after 1 year	If you cash in after 10 years	If you cash in after 20 years (Recommended holding period)
<b>Total costs (€)</b>	1,000.00	3,471.54	6,436.74
<b>Impact on return (RIY) per year (%)</b>	103.18%	7.91%	3.27%

## Composition of Costs

The table below shows:

- the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period;
- the meaning of the different cost categories.

**This table shows the impact on return per year**

<b>One-off costs</b>	<b>Entry costs</b>	0.97%	The impact of costs you pay when entering your investment. The impact of the costs already included in the price. This includes the costs of distribution of your product.
	<b>Exit costs</b>	0.00%	The impact of the costs of exiting your investment when it matures.
<b>Ongoing costs</b>	<b>Portfolio transaction costs</b>	0.34%	The impact of the costs of us buying and selling underlying investments for the product.
	<b>Other ongoing costs</b>	1.96%	The impact of the costs that we take each year for managing your investments and the costs presented in the part "What is this product?".
<b>Incidental costs</b>	<b>Performance fees</b>	0.00%	The impact of performance fee.
	<b>Carried interests</b>	0.00%	The impact of carried interests.

## How long should I hold it and can I take money out early?

### Recommended holding period: 20 years

We set recommended holding period taking into consideration entry costs of the product, nature of the offered investment options (Funds) as well as considering the fact that investing is connected with life insurance. Longer holding period decreases the impact of entry costs and increases probability of reaching profits. Cancellation of the contract before recommended holding period may have an impact on risk and return profile of the product. Early cancellation as well as partial surrender may have a negative impact on performance of the product and may lead to high costs.

You are entitled to withdraw from the insurance contract within 30 days after conclusion. In such case, we will return you the whole paid premium after deduction of what has been already claimed from the insurance. You can cancel the insurance contract anytime without stating a reason. In such case, we will pay you surrender value based on the value of investment in the date of cancellation of the contract (after deducting NOVIS Loyalty Bonus). In the case of termination of the insurance contract agreed for an indefinite period, the NOVIS Loyalty bonus is not paid (termination before 20 years) or is paid in part (2,000 € after 20 years contract duration, 4,000 € after 30 years contract duration) or is paid in full 6,000 € (after at least 40 years contract duration). Similar rules apply to fixed-term contracts. Modelled development of the surrender value is shown in the model calculation which you will receive before conclusion of the contract. If you decide to cancel the contract during first 10 years, the surrender value will be decreased by 3%. After 12 months from the conclusion of the insurance contract, you have the right to withdraw part of your investment, but at least 500 € (partial surrender). After the completion of the partial surrender at least value of 1,000 € must remain on the insurance account (excluding the current value of the loyalty bonus). The amount you claim in the first 10 years of the contract will be reduced by a deduction of 3% of the requested partial surrender amount. You can find information about impact of fees for different holding periods in the „What are the costs?“ section. All information regarding fees is in the pricelist which is part of the contractual documentation of this product.

### How can I complain?

You can file a complaint in writing to NOVIS Insurance Company, NOVIS Versicherungsgesellschaft, NOVIS Compagnia di Assicurazioni, NOVIS Poist'ovňa a.s., Námestie Ľudovíta Štúra 2, 811 02 Bratislava, Slovakia or to the e-mail address [fyrispurnir@novis.eu](mailto:fyrispurnir@novis.eu). You will receive a response to the complaint within 30 days (in justified cases within 60 days) as required by the applicable legislation. You can also contact the Financial Supervisory Authority, at Katrinartuni2, 105 Reykjavik, Iceland or the National Bank of Slovakia, at Imricha Karvaša 1, 813 05 Bratislava, Slovakia. For more detailed information on handling complaints, please see the General Terms and Conditions or visit our website <https://www.novis.eu/is/complaints-management>.

### Other relevant information

This document is published and the Insurer will publish any revision (once it is necessary) to this document on its website <https://www.novis.eu/is/key-information-document>. Other additional information documents based on the legal requirement, such as General Terms and Conditions, Statutes of the Internal funds, Sustainability-related precontractual information, Environmental and/or social characteristics of the product are available for you on the website [www.novis.eu](http://www.novis.eu) or are handed to you by the financial intermediary together with the application form.

# Key Information Document

## Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

## Product

**Product name:** NOVIS "Life Savings Plan", GTC-17191207, NOVIS Global Select Insurance Fund, regular premium, currency: Euro

**Manufacturer:** NOVIS Insurance Company, NOVIS Versicherungsgesellschaft, NOVIS Compagnia di Assicurazioni, NOVIS Poistovňa a.s., Námestie Ľudovíta Štúra 2, 811 02 Bratislava (Slovakia), [www.novis.eu](http://www.novis.eu)

**You are about to purchase a product that is not simple and may be difficult to understand.**

## What is this product?

### Type

NOVIS "Life Savings Plan" is life insurance connected with investing into own funds of Insurer based on section 64 point 6 of Slovak insurance law. Own fund of Insurer is portfolio of assets owned by Insurer specially allocated to cover the liabilities in life insurance for selected group of contracts. The insurance contract is governed by the Icelandic contractual law. This document is prepared for investing into NOVIS Global Select Insurance Fund (hereinafter „Fund“).

### Objectives

The objective of the product is to provide insurance benefits to the policyholder or other insured persons, potentially allowing for capital growth through the included investment options. Investment objective of the Fund is to increase the value of investment significantly over the level of inflation in long term by investing directly or indirectly into stocks listed on major stock exchanges worldwide, which forms majority of investments. Minor share may be invested into corporate or government bonds. In order to provide the necessary liquidity, the Fund may invest to a limited extent (up to 20%) in bank deposits with banks located in countries of the European Economic Area. Other assets may form maximum 20% of Fund portfolio. It is expected although not guaranteed, that this Fund may have high performance due to large share of stocks but also bears higher risk of fluctuation of its value which is partly leveraged by broad global diversification of assets. The aim of the Fund is to invest primarily into investment funds, which has lower costs ratio than the average costs of investment funds. Fund invests across the sectors of economy and without geographical limitations. The structure of the portfolio is not fixed but may change over time depending on market conditions. The income and revenues of the Fund are fully reinvested and are not intended to pay dividends. The return on investment and the value of the investment are largely dependent on the development of the underlying assets, and there is a direct relationship between the return on investment and the performance of the Fund. The Fund is denominated in EUR, but the underlying assets may be denominated in other currencies, which implies that the yield in the Fund may be influenced not only by the performance of the assets, but also by the currency exchange rates. Currency risk is not hedged. The Fund does not provide any yield guarantee or return on invested funds. The Fund does not monitor or copy any index and does not have a benchmark.

Detailed information is included in the individual Statute of this Fund and on our website <https://www.novis.eu/is/novis-funds>.

### Intended Retail Investor

Product is aimed at clients who are interested in life insurance and who are at the same time interested in investing, while their goal is to evaluate invested resources in long term (minimum recommended period for investment is 20 years). The client to whom product is addressed is supposed to be able to support a long-term financial burden related to regular premium payments. Fund is designed for clients with good general knowledge or experience with investments and at least basic knowledge or experience with investments into shares or shares funds, whose investment objective is to achieve return of investment significantly over the level of inflation in long term and who are willing to accept medium fluctuation of value of investment over time and medium risk of losses.

### Insurance benefits and costs

The product includes insurance coverage in case of death for at least one of the insured persons. The insurance benefit in case of death of the insured person is the insured sum agreed in the contract (from the 11th year of the duration of the insurance contract, the agreed insured sums are annually decreased by 10 % of the insured sum of the previous year. Despite this rule, the insured sums can not fall below 5,000 €). In the event of the policyholder's death, the current value of the insurance account (investment) is also paid. Beneficiaries designated by you are the beneficiaries of the insurance benefit or, if you do not designate the beneficiaries, they are stipulated by law. If you reach the end of the agreed insurance period, you will be paid the current value of the insurance account (investment). According to conditions in the General Terms and Conditions, a NOVIS Loyalty Bonus is credited to the insurance account (in the amount of 6,000 €) and is the part of the value of the insurance account in the event of the policyholder's death. In addition to the death coverage, there are optional supplementary insurance coverages (in case of disability and critical illnesses), which can be agreed in the insurance contract. The insurance contract includes the possibility to request a payment of a part or of the whole value of the insurance account in the form of a pension. This document does not apply to supplementary insurance coverage agreed under this product. The price of insurance coverage is deducted monthly from the value of the insurance account in the form of deductions based on the sum insured, age, health, employment, sport or other activities of the insured person. The impact of insurance deductions and other insurance contract costs is set out in "What are the Costs?". For more details on the calculation of deductions for the insurance coverage, insurance coverage, situations where claims may be reduced or denied (exclusions, waiting periods), as well as the methods of calculating the values of insurance benefits, see the General Terms and Conditions.

The model example in this document is based on one insured person at the age of 35 (at the time of the conclusion of the insurance contract), without health problems and indicators of unhealthy lifestyle, without carrying out risky occupations or risky activities, with the insurance coverage in case of death 20,000 € and duration of the insurance contract of 20 years, with a total of 20 yearly premium payments of regular paid premiums (investments) of 1,000 € per year and 20,000 € in total. The risk premium for the insurance coverage in case of death is independent of sex and varies according to the age of the insured person. It represents a total of 607.86 €, which is an average of 30.39 € per year and corresponds to 3.04% of the investment. The resulting reduction in investment return at maturity after 20 years is 0.29% per year. This reduction in yield due to deductions for death coverage is already reflected in the yield data. The annual investment net of the average risk premium is 969.61 €. The "What are the risks and what could I get?" section provides data based on the parameters in this model example.

### Duration

The insurance contract may be concluded for an indefinite period of time, unless agreed otherwise in the insurance contract. If the contract is concluded for a definite period, the end of the insurance period is also the day of maturity of the product. The period of obligation to pay for fixed-term contracts is the same as the period for which the insurance contract is agreed. If the insurance contract is concluded for an indefinite period, the product has no fixed maturity. In the case of contracts for an indefinite period, the obligation to pay the regular premium is up to the age of 70, but at least 20 years.

In violation of the obligation to answer truthfully and completely to our written questions, we may withdraw from the contract if we did not conclude the contract with true answers. Due to a breach of the same obligation, we may limit our liability partly or in full, to pay declared claims.

The insurance contract shall automatically terminate by failure to pay agreed premium following final notice of the insurer of non-payments of premium; failure to pay premiums for the next insurance period within fourteen days of receiving the notice for payment; in the event of your death (if the policyholder is not the insured party based on the insurance contract, the insured person will become the new policyholder, if this is agreed with us); if the insurance has changed to paid-up policy status and the units kept in the insurance account will not be sufficient to cover the deductions (the product will expire on the last day of the second month following the month in which the value of the insurance account is not sufficient for the first time).

## What are the risks and what could I get in return?

### Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity to pay you.

**Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.**

Information regarding costs applicable in case of early cancellation of the contract is included in the section "How long should I hold it and can I take money out early?".

This product does not include any protection from future market performance so you could lose some or all of your investment.

If NOVIS Insurance Company, NOVIS Versicherungsgesellschaft, NOVIS Compagnia di Assicurazioni, NOVIS Poistovňa a.s. is not able to pay you what is owed, you could lose your entire investment.

### Performance scenarios

Market developments in the future cannot be accurately predicted. The scenarios shown are only an indication of some of the possible outcomes based on recent returns.

Investment 1,000 € per year Average yearly risk premium 30.39 € Survival Scenarios		1 year	10 years	20 years (Recommended holding period)
<b>Stress scenario</b>	What you might get back after costs (€)	0.00	5,903.59	13,067.51
	Average return each year (%)	-100.00%	-9.86%	-4.26%
<b>Unfavourable scenario</b>	What you might get back after costs (€)	0.00	8,709.79	28,991.91
	Average return each year (%)	-100.00%	-2.53%	3.42%
<b>Moderate scenario</b>	What you might get back after costs (€)	0.00	10,210.47	36,171.49
	Average return each year (%)	-100.00%	0.38%	5.35%
<b>Favourable scenario</b>	What you might get back after costs (€)	0.00	12,129.69	46,254.87
	Average return each year (%)	-100.00%	3.48%	7.45%
<b>Accumulated invested amount (€)</b>		1,000.00	10,000.00	20,000.00

Death Scenario		1 year	10 years	20 years (Recommended holding period)
<b>Death of Policyholder</b>	What your beneficiary might get back after costs (€)	26,600.13	36,526.26	47,145.06
<b>Accumulated risk premium (€)</b>		15.12	236.16	607.86

This table shows the money you could get back over the next 20 years, under different scenarios, assuming that you invest 1,000 € per year.

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products.

The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment/product.

The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your adviser or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

### What happens if NOVIS Insurance Company, NOVIS Versicherungsgesellschaft, NOVIS Compagnia di Assicurazioni, NOVIS Poistovňa a.s. is unable to pay out?

The insurance company's liabilities resulting from insurance activities, including insurance benefits under the insurance contract, are not covered by the consumer protection scheme in case of insolvency of the Insurer. The Insurer is a joint stock company under the Slovak law and is subject to insurance supervision by the National Bank of Slovakia and has to meet the solvency and capital requirements under the Slovak Insurance Act, which is valid for the Insurer. In the event of insolvency of the Insurer, all claims of policyholders must first be fulfilled, and only then other claims can be fulfilled. Therefore, the assets held to cover technical reserves are fully available to cover insurance claims. There is no guarantee that this procedure will result in a 100% fulfilment of all insurance claims. It is possible that the policyholder can experience a total financial loss if the assets are not sufficient to meet the demands of all clients.

### What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for three different holding periods. They include potential early exit penalties. The figures assume you invest 1,000 € each year. The figures are estimates and may change in the future.

### Costs over Time

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Investment 1,000 € per year			
Scenarios	If you cash in after 1 year	If you cash in after 10 years	If you cash in after 20 years (Recommended holding period)
<b>Total costs (€)</b>	1,000.00	3,663.05	7,747.15
<b>Impact on return (RIY) per year (%)</b>	108.92%	8.32%	3.65%

## Composition of Costs

The table below shows:

- the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period;
- the meaning of the different cost categories.

**This table shows the impact on return per year**

<b>One-off costs</b>	<b>Entry costs</b>	1.32%	The impact of costs you pay when entering your investment. The impact of the costs already included in the price. This includes the costs of distribution of your product.
	<b>Exit costs</b>	0.00%	The impact of the costs of exiting your investment when it matures.
<b>Ongoing costs</b>	<b>Portfolio transaction costs</b>	0.31%	The impact of the costs of us buying and selling underlying investments for the product.
	<b>Other ongoing costs</b>	2.01%	The impact of the costs that we take each year for managing your investments and the costs presented in the part "What is this product?".
<b>Incidental costs</b>	<b>Performance fees</b>	0.00%	The impact of performance fee.
	<b>Carried interests</b>	0.00%	The impact of carried interests.

## How long should I hold it and can I take money out early?

### Recommended holding period: 20 years

We set recommended holding period taking into consideration entry costs of the product, nature of the offered investment options (Funds) as well as considering the fact that investing is connected with life insurance. Longer holding period decreases the impact of entry costs and increases probability of reaching profits. Cancellation of the contract before recommended holding period may have an impact on risk and return profile of the product. Early cancellation as well as partial surrender may have a negative impact on performance of the product and may lead to high costs.

You are entitled to withdraw from the insurance contract within 30 days after conclusion. In such case, we will return you the whole paid premium after deduction of what has been already claimed from the insurance. You can cancel the insurance contract anytime without stating a reason. In such case, we will pay you surrender value based on the value of investment in the date of cancellation of the contract (after deducting NOVIS Loyalty Bonus). In the case of termination of the insurance contract agreed for an indefinite period, the NOVIS Loyalty bonus is not paid (termination before 20 years) or is paid in part (2,000 € after 20 years contract duration, 4,000 € after 30 years contract duration) or is paid in full 6,000 € (after at least 40 years contract duration). Similar rules apply to fixed-term contracts. Modelled development of the surrender value is shown in the model calculation which you will receive before conclusion of the contract. If you decide to cancel the contract during first 10 years, the surrender value will be decreased by 3%. After 12 months from the conclusion of the insurance contract, you have the right to withdraw part of your investment, but at least 500 € (partial surrender). After the completion of the partial surrender at least value of 1,000 € must remain on the insurance account (excluding the current value of the loyalty bonus). The amount you claim in the first 10 years of the contract will be reduced by a deduction of 3% of the requested partial surrender amount. You can find information about impact of fees for different holding periods in the „What are the costs?“ section. All information regarding fees is in the pricelist which is part of the contractual documentation of this product.

### How can I complain?

You can file a complaint in writing to NOVIS Insurance Company, NOVIS Versicherungsgesellschaft, NOVIS Compagnia di Assicurazioni, NOVIS Poist'ovňa a.s., Námestie Ľudovíta Štúra 2, 811 02 Bratislava, Slovakia or to the e-mail address [fyriirspurnir@novis.eu](mailto:fyriirspurnir@novis.eu). You will receive a response to the complaint within 30 days (in justified cases within 60 days) as required by the applicable legislation. You can also contact the Financial Supervisory Authority, at Katrinartuni2, 105 Reykjavik, Iceland or the National Bank of Slovakia, at Imricha Karvaša 1, 813 05 Bratislava, Slovakia. For more detailed information on handling complaints, please see the General Terms and Conditions or visit our website <https://www.novis.eu/is/complaints-management>.

### Other relevant information

This document is published and the Insurer will publish any revision (once it is necessary) to this document on its website <https://www.novis.eu/is/key-information-document>. Other additional information documents based on the legal requirement, such as General Terms and Conditions, Statutes of the Internal funds, Sustainability-related precontractual information, Environmental and/or social characteristics of the product are available for you on the website [www.novis.eu](http://www.novis.eu) or are handed to you by the financial intermediary together with the application form.

# Key Information Document

## Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

## Product

**Supervisory authority:** Národná banka Slovenska (National Bank of Slovakia), Imricha Karvaša 1, 813 25 Bratislava (Slovakia)

**Date of production of the KID:** 29/10/2021

**You are about to purchase a product that is not simple and may be difficult to understand.**

## What is this product?

### Type

NOVIS "Life Savings Plan" is life insurance connected with investing into own funds of Insurer based on section 64 point 6 of Slovak insurance law. Own fund of Insurer is portfolio of assets owned by Insurer specially allocated to cover the liabilities in life insurance for selected group of contracts. The insurance contract is governed by the Icelandic contractual law. This document is prepared for investing into NOVIS Sustainability Insurance Fund (hereinafter „Fund“).

### Objectives

The objective of the product is to provide insurance benefits to the policyholder or other insured persons, potentially allowing for capital growth through the included investment options. Investment objective of the Fund is to increase the value of investment significantly over the level of inflation in long term by investing directly or indirectly into stocks or bonds of companies which comply with strict corporate governance, environmental and social criteria. Minimum required criteria are based on UN criteria for ESG investments. Another aim of the Fund is to invest into companies which fulfils criteria for impact investments, while Fund uses the publicly available definitions of impact investments when deciding about the selection of securities. Promotes environmental or social characteristics, but does not have as its objective a sustainable investment. In order to provide the necessary liquidity, the Fund may invest to a limited extent (up to 20%) in bank deposits with banks located in countries of the European Economic Area. It is expected although not guaranteed, that this Fund may have high performance due to large share of stocks but also bears higher risk of fluctuation of its value. Fund invests across the sectors of economy and without geographical limitations. The structure of the portfolio is not fixed but may change over time depending on market conditions. The income and revenues of the Fund are fully reinvested and are not intended to pay dividends. The return on investment and the value of the investment are largely dependent on the development of the underlying assets, and there is a direct relationship between the return on investment and the performance of the Fund. The Fund is denominated in EUR, but the underlying assets may be denominated in other currencies, which implies that the yield in the Fund may be influenced not only by the performance of the assets, but also by the currency exchange rates. Currency risk is not hedged. The Fund does not provide any yield guarantee or return on invested funds. The Fund does not monitor or copy any index and does not have a benchmark.

Detailed information is included in the individual Statute of this Fund and on our website <https://www.novis.eu/is/novis-funds>.

### Intended Retail Investor

Product is aimed at clients who are interested in life insurance and who are at the same time interested in investing, while their goal is to evaluate invested resources in long term (minimum recommended period for investment is 20 years). The client to whom product is addressed is supposed to be able to support a long-term financial burden related to regular premium payments. Fund is designed for clients with good general knowledge or experience with investments and at least basic knowledge or experience with investments into shares, bonds or funds investing into these assets who at the same time have at least basic knowledge of principles of responsible or sustainable investing, whose investment objective is to achieve return of investment significantly over the level of inflation in long term and who are willing to accept medium fluctuation of value of investment over time and medium risk of losses.

### Insurance benefits and costs

The product includes insurance coverage in case of death for at least one of the insured persons. The insurance benefit in case of death of the insured person is the insured sum agreed in the contract (from the 11th year of the duration of the insurance contract, the agreed insured sums are annually decreased by 10 % of the insured sum of the previous year. Despite this rule, the insured sums can not fall below 5,000 €). In the event of the policyholder's death, the current value of the insurance account (investment) is also paid. Beneficiaries designated by you are the beneficiaries of the insurance benefit or, if you do not designate the beneficiaries, they are stipulated by law. If you reach the end of the agreed insurance period, you will be paid the current value of the insurance account (investment). According to conditions in the General Terms and Conditions, a NOVIS Loyalty Bonus is credited to the insurance account (in the amount of 6,000 €) and is the part of the value of the insurance account in the event of the policyholder's death. In addition to the death coverage, there are optional supplementary insurance coverages (in case of disability and critical illnesses), which can be agreed in the insurance contract. The insurance contract includes the possibility to request a payment of a part or of the whole value of the insurance account in the form of a pension. This document does not apply to supplementary insurance coverage agreed under this product. The price of insurance coverage is deducted monthly from the value of the insurance account in the form of deductions based on the sum insured, age, health, employment, sport or other activities of the insured person. The impact of insurance deductions and other insurance contract costs is set out in "What are the Costs?". For more details on the calculation of deductions for the insurance coverage, insurance coverage, situations where claims may be reduced or denied (exclusions, waiting periods), as well as the methods of calculating the values of insurance benefits, see the General Terms and Conditions.

The model example in this document is based on one insured person at the age of 35 (at the time of the conclusion of the insurance contract), without health problems and indicators of unhealthy lifestyle, without carrying out risky occupations or risky activities, with the insurance coverage in case of death 20,000 € and duration of the insurance contract of 20 years, with a total of 20 yearly premium payments of regular paid premiums (investments) of 1,000 € per year and 20,000 € in total. The risk premium for the insurance coverage in case of death is independent of sex and varies according to the age of the insured person. It represents a total of 607.86 €, which is an average of 30.39 € per year and corresponds to 3.04% of the investment. The resulting reduction in investment return at maturity after 20 years is 0.29% per year. This reduction in yield due to deductions for death coverage is already reflected in the yield data. The annual investment net of the average risk premium is 969.61 €. The "What are the risks and what could I get?" section provides data based on the parameters in this model example.

### Duration

The insurance contract may be concluded for an indefinite period of time, unless agreed otherwise in the insurance contract. If the contract is concluded for a definite period, the end of the insurance period is also the day of maturity of the product. The period of obligation to pay for fixed-term contracts is the same as the period for which the insurance contract is agreed. If the insurance contract is concluded for an indefinite period, the product has no fixed maturity. In the case of contracts for an indefinite period, the obligation to pay the regular premium is up to the age of 70, but at least 20 years.

In violation of the obligation to answer truthfully and completely to our written questions, we may withdraw from the contract if we did not conclude the contract with true answers. Due to a breach of the same obligation, we may limit our liability partly or in full, to pay declared claims.

The insurance contract shall automatically terminate by failure to pay agreed premium following final notice of the insurer of non-payments of premium; failure to pay premiums for the next insurance period within fourteen days of receiving the notice for payment; in the event of your death (if the policyholder is not the insured party based on the insurance contract, the insured person will become the new policyholder, if this is agreed with us); if the insurance has changed to paid-up policy status and the units kept in the insurance account will not be sufficient to cover the deductions (the product will expire on the last day of the second month following the month in which the value of the insurance account is not sufficient for the first time).

## What are the risks and what could I get in return?

### Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact the capacity to pay you.

**Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.**

Information regarding costs applicable in case of early cancellation of the contract is included in the section "How long should I hold it and can I take money out early?".

This product does not include any protection from future market performance so you could lose some or all of your investment.

If NOVIS Insurance Company, NOVIS Versicherungsgesellschaft, NOVIS Compagnia di Assicurazioni, NOVIS Poistovňa a.s. is not able to pay you what is owed, you could lose your entire investment.

### Performance scenarios

Market developments in the future cannot be accurately predicted. The scenarios shown are only an indication of some of the possible outcomes based on recent returns. Actual returns could be lower.

Investment 1,000 € per year Average yearly risk premium 30.39 € Survival Scenarios		1 year	10 years	20 years (Recommended holding period)
<b>Stress scenario</b>	What you might get back after costs (€)	0.00	5,091.59	10,775.02
	Average return each year (%)	-100.00%	-12.76%	-6.35%
<b>Unfavourable scenario</b>	What you might get back after costs (€)	0.00	9,011.10	32,206.67
	Average return each year (%)	-100.00%	-1.90%	4.34%
<b>Moderate scenario</b>	What you might get back after costs (€)	0.00	11,296.11	44,543.68
	Average return each year (%)	-100.00%	2.20%	7.13%
<b>Favourable scenario</b>	What you might get back after costs (€)	0.00	14,551.48	64,706.77
	Average return each year (%)	-100.00%	6.72%	10.22%
<b>Accumulated invested amount (€)</b>		1,000.00	10,000.00	20,000.00

Death Scenario		1 year	10 years	20 years (Recommended holding period)
<b>Death of Policyholder</b>	What your beneficiary might get back after costs (€)	26,611.90	37,645.47	55,517.25
<b>Accumulated risk premium (€)</b>		15.12	236.16	607.86

This table shows the money you could get back over the next 20 years, under different scenarios, assuming that you invest 1,000 € per year.

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products.

The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment/product.

The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your adviser or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

### What happens if NOVIS Insurance Company, NOVIS Versicherungsgesellschaft, NOVIS Compagnia di Assicurazioni, NOVIS Poistovňa a.s. is unable to pay out?

The insurance company's liabilities resulting from insurance activities, including insurance benefits under the insurance contract, are not covered by the consumer protection scheme in case of insolvency of the Insurer. The Insurer is a joint stock company under the Slovak law and is subject to insurance supervision by the National Bank of Slovakia and has to meet the solvency and capital requirements under the Slovak Insurance Act, which is valid for the Insurer. In the event of insolvency of the Insurer, all claims of policyholders must first be fulfilled, and only then other claims can be fulfilled. Therefore, the assets held to cover technical reserves are fully available to cover insurance claims. There is no guarantee that this procedure will result in a 100% fulfilment of all insurance claims. It is possible that the policyholder can experience a total financial loss if the assets are not sufficient to meet the demands of all clients.

### What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for three different holding periods. They include potential early exit penalties. The figures assume you invest 1,000 € each year. The figures are estimates and may change in the future.

### Costs over Time

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Investment 1,000 € per year			
Scenarios	If you cash in after 1 year	If you cash in after 10 years	If you cash in after 20 years (Recommended holding period)
<b>Total costs (€)</b>	1,000.00	3,654.20	7,843.91
<b>Impact on return (RIY) per year (%)</b>	110.76%	8.28%	3.59%

## Composition of Costs

The table below shows:

- the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period;
- the meaning of the different cost categories.

**This table shows the impact on return per year**

<b>One-off costs</b>	<b>Entry costs</b>	1.44%	The impact of costs you pay when entering your investment. The impact of the costs already included in the price. This includes the costs of distribution of your product.
	<b>Exit costs</b>	0.00%	The impact of the costs of exiting your investment when it matures.
<b>Ongoing costs</b>	<b>Portfolio transaction costs</b>	0.13%	The impact of the costs of us buying and selling underlying investments for the product.
	<b>Other ongoing costs</b>	2.02%	The impact of the costs that we take each year for managing your investments and the costs presented in the part "What is this product?".
<b>Incidental costs</b>	<b>Performance fees</b>	0.00%	The impact of performance fee.
	<b>Carried interests</b>	0.00%	The impact of carried interests.

## How long should I hold it and can I take money out early?

### Recommended holding period: 20 years

We set recommended holding period taking into consideration entry costs of the product, nature of the offered investment options (Funds) as well as considering the fact that investing is connected with life insurance. Longer holding period decreases the impact of entry costs and increases probability of reaching profits. Cancellation of the contract before recommended holding period may have an impact on risk and return profile of the product. Early cancellation as well as partial surrender may have a negative impact on performance of the product and may lead to high costs.

You are entitled to withdraw from the insurance contract within 30 days after conclusion. In such case, we will return you the whole paid premium after deduction of what has been already claimed from the insurance. You can cancel the insurance contract anytime without stating a reason. In such case, we will pay you surrender value based on the value of investment in the date of cancellation of the contract (after deducting NOVIS Loyalty Bonus). In the case of termination of the insurance contract agreed for an indefinite period, the NOVIS Loyalty bonus is not paid (termination before 20 years) or is paid in part (2,000 € after 20 years contract duration, 4,000 € after 30 years contract duration) or is paid in full 6,000 € (after at least 40 years contract duration). Similar rules apply to fixed-term contracts. Modelled development of the surrender value is shown in the model calculation which you will receive before conclusion of the contract. If you decide to cancel the contract during first 10 years, the surrender value will be decreased by 3%. After 12 months from the conclusion of the insurance contract, you have the right to withdraw part of your investment, but at least 500 € (partial surrender). After the completion of the partial surrender at least value of 1,000 € must remain on the insurance account (excluding the current value of the loyalty bonus). The amount you claim in the first 10 years of the contract will be reduced by a deduction of 3% of the requested partial surrender amount. You can find information about impact of fees for different holding periods in the „What are the costs?“ section. All information regarding fees is in the pricelist which is part of the contractual documentation of this product.

### How can I complain?

You can file a complaint in writing to NOVIS Insurance Company, NOVIS Versicherungsgesellschaft, NOVIS Compagnia di Assicurazioni, NOVIS Poist'ovňa a.s., Námestie Ľudovíta Štúra 2, 811 02 Bratislava, Slovakia or to the e-mail address [fyriirspurnir@novis.eu](mailto:fyriirspurnir@novis.eu). You will receive a response to the complaint within 30 days (in justified cases within 60 days) as required by the applicable legislation. You can also contact the Financial Supervisory Authority, at Katrinartuni2, 105 Reykjavik, Iceland or the National Bank of Slovakia, at Imricha Karvaša 1, 813 05 Bratislava, Slovakia. For more detailed information on handling complaints, please see the General Terms and Conditions or visit our website <https://www.novis.eu/is/complaints-management>.

### Other relevant information

This document is published and the Insurer will publish any revision (once it is necessary) to this document on its website <https://www.novis.eu/is/key-information-document>. Other additional information documents based on the legal requirement, such as General Terms and Conditions, Statutes of the Internal funds, Sustainability-related precontractual information, Environmental and/or social characteristics of the product are available for you on the website [www.novis.eu](http://www.novis.eu) or are handed to you by the financial intermediary together with the application form.
