2. Summary of Significant Accounting Policies

(a) The accompanying financial statements have been prepared in accordance with the format prescribed by Luxembourg regulations. Combined figures appearing in the Statement of Net Assets are for statistical purposes only and should not be used by investors with holdings in one or more sub-funds.

(b) Valuation of investments

Investments, including financial derivative instruments, are valued on the basis of the latest dealing price or the latest available midmarket quotation (the midpoint between the latest quoted bid and offer prices) of the securities on the relevant securities market on which the investments of the Fund are traded, quoted or dealt as at the Valuation Point on that day. Where investments of a sub-fund are both listed on a stock exchange and dealt by market makers outside the stock exchange on which the investments are listed, then the SICAV will determine the principal market for the investments in question and they are valued at the latest available price in that market. Securities which are not quoted or dealt in any stock exchange but which are dealt in on any other regulated market are valued in a manner as near as possible to that described above. If no price quotation is available for any of the securities held by a sub-fund or if the value as determined pursuant to the points above is not representative of the fair market value of the relevant securities, the value of such securities is based on the reasonably foreseeable sales price determined prudently and in good faith. Short-term money-market Instruments are valued based on amortised cost method.

The financial statements have been prepared on the basis of the last Net Asset Values determined in the accounting period. In accordance with the Prospectus, Net Asset Values were calculated by reference to the latest available prices at 1.00 p.m. (Luxembourg time) on 31 August 2020 for all the Invesco sub-funds apart from Global Targeted Returns Select II Fund which is valued at 4 p.m. Eastern Standard Time (EST) on 31 August 2020.

(c) Impact on Values

By way of information, if the Fund had calculated the Net Asset Values solely with a view to publication, the market prices used to value the investment portfolio would have been the closing prices on 31 August 2020 for the entire investment portfolio, including the American and European equities. However, these Net Asset Values would not have been significantly different from those shown in these audited financial statements except for the following sub-funds:

Invesco Developed Small and Mid-Cap Equity Fund; a decrease in the Net Asset Value of approximately 0.86% would have been observed.
Invesco Emerging Markets Equity Fund; a decrease in the Net Asset Value of approximately 0.77% would have been observed.
Invesco Global Equity Income Fund; a decrease in the Net Asset Value of approximately 0.84% would have been observed.

2. Summary of Significant Accounting Policies (continued)

(d) Cost of sales of investments

Any surplus or deficit on sales of investments is determined on the basis of average cost.

(e) Income from investments

Dividend income is accounted for on an ex-dividend basis. Income arising on fixed interest securities and deposit interest is accrued on a day-to-day basis. Amortisation/Accretion of Premium/Discount is disclosed under the Income section on the Statement of Operations and Changes in Net Assets (disclosed at year end only). Amortisation is the process of decreasing the book value of a bond purchased at a premium until the book value is equal to the par value at the time of maturity. As the book value is reduced, it is accounted for as a reduction in net investment income. Accretion is the process of writing up the book value of a bond purchased at a discount. As the book value is increased, it is accounted for as an increase in net investment income. The Amortisation /Accretion approach provides a consistent accounting treatment over the life of bond-like assets of the capital gain or loss associated with holding these assets.

(f) Foreign exchange

Transactions in currencies other than the designated currency for each sub-fund are translated at the rates of exchange ruling at the time of the transactions. The market value of the investments and other assets and liabilities in currencies other than the designated currency for each sub-fund are translated at the rates of exchange ruling at the period end.

(g) Expenses allocation

Where the Fund incurs an expense which relates to a particular sub-fund, such expense is allocated to the relevant sub-fund. In cases where an expense cannot be considered as being attributable to a particular sub-fund, such expense is allocated between sub-funds on the basis of their respective Net Asset Values.

(h) Preliminary expenses

Preliminary expenses will be borne by the Management Company. During the period ended 31 August 2020, there were no preliminary expenses.

(i) Forward foreign exchange contracts

The unrealised gain or loss on open forward foreign exchange contracts is calculated as the difference between the contracted rate and the rate to close out the contract and is disclosed in the Statement of Net Assets (see note 7 for details). Realised gains or losses include net results on contracts which have been settled or offset on other contracts and are recorded in the Statement of Operations and Changes in Net Assets (disclosed at year end only). The unrealised appreciation/depreciation is disclosed in the Statement of Net Assets under "Unrealised gain/(loss) on forward foreign exchange contracts" (see note 7 for details). Realised gains/(losses) and changes in unrealised appreciation/depreciation as a result thereof are included in the Statement of Operations and Changes in Net Assets respectively under "Net realised gain/(loss) on investments, derivatives and foreign currencies and other" and "Net change in unrealised appreciation/depreciation on forward foreign exchange contracts" (disclosed at year end only).

Notes to the Financial Statements (continued)

2. Summary of Significant Accounting Policies (continued)

(i) Forward foreign exchange contracts (continued)

Non-Deliverable Forwards ("NDF") are short-term forward contracts on thinly traded or non-convertible foreign currencies. Those contracts are valued on the basis of forward exchange rates prevailing at the closing date and applicable to the remaining period until the expiration date. The unrealised gains or losses resulting from NDF are included in the Statement of Net Assets. The NDF are normally quoted and settled in USD. The NDF are disclosed together with other forward foreign exchange contracts in note 7.

(j) Futures contracts

A futures contract is a legal agreement to buy or sell a particular commodity or financial instrument at a predetermined price at a specified time in the future. Futures contracts are initially recognised at cost and subsequently are re-measured at market value. Market values are obtained from quoted market prices and exchange rates. All futures contracts are carried in assets when amounts are receivable by the Fund and in liabilities when amounts are payable by the Fund. Changes in market values of futures contracts are included in the Statement of Net Assets (see note 8 for details). The unrealised appreciation /depreciation is disclosed in the Statement of Net Assets under "Unrealised gain/(loss) on futures contracts" (see note 8 for details). Realised gains/(losses) and changes in unrealised appreciation/depreciation as a result thereof are included in the Statement of Operations and Changes in Net Assets respectively under "Net realised gain/(loss) on investments, derivatives and foreign currencies and other" and "Net change in unrealised appreciation/depreciation on futures contracts" (disclosed at year end only).

(k) Credit default swaps

A credit default swap is a credit derivative transaction in which two parties enter into an agreement, whereby one party pays the other a fixed periodic coupon for the specified life of the agreement. The other party makes no payments unless a credit event, relating to a predetermined reference asset occurs. If such an event occurs, the party will then make a payment to the first party and the swap will terminate. The credit default swaps are marked to market daily based upon quotations from market makers and recorded in the Statement of Net Assets (see note 9 for details). The unrealised appreciation /depreciation is disclosed in the Statement of Net Assets under "Unrealised gain/(loss) on credit default swaps" (see note 9 for details). Realised gains/(losses) and changes in unrealised appreciation/depreciation as a result thereof are included in the Statement of Operations and Changes in Net Assets respectively under "Net realised gain/(loss) on investments, derivatives and foreign currencies and other" and "Net change in unrealised appreciation/depreciation on credit default swaps" (disclosed at year end only).

(l) Equity variance swaps

An equity variance swap is a bilateral agreement in which each party agrees to exchange cash flows based on the measured variance of a specified underlying asset. One party agrees to exchange a "fixed rate" or strike price payment for the "floating rate" or realised price variance on the underlying asset with respect to the variance notional amount. At the maturity date, a net cash flow is exchanged, where the payoff amount is equivalent to the difference between the realised price variance of the underlying asset and the strike price multiplied by the variance notional amount. Equity variance swaps are marked to market at each NAV calculation date. The estimated market value is based on the valuation elements laid down in the contracts, and is obtained from third party pricing agents, market makers or internal models. The unrealised appreciation/depreciation is disclosed in the Statement of Net Assets under "Unrealised gain/(loss) on equity variance swaps" (see note 10 for details). Realised gains/(losses) and changes in unrealised appreciation /depreciation as a result thereof are included in the Statement of Operations and Changes in Net Assets respectively under "Net realised gain/(loss) on investments, derivatives and foreign currencies and other" and "Net change in unrealised appreciation/depreciation on equity variance swaps" (disclosed at year end only).

(m) Volatility swaps

A volatility swap is a bilateral agreement in which each party agrees to exchange cash flows based on the measured volatility of a specified underlying asset. One party agrees to exchange a "fixed rate" or strike price payment for the "floating rate" or realised price volatility on the underlying asset with respect to the volatility notional amount. At the maturity date, a net cash flow is exchanged, where the payoff amount is equivalent to the difference between the realised price volatility of the underlying asset and the strike price multiplied by the volatility notional amount. Volatility swaps are marked to market at each NAV calculation date. The estimated market value is based on the valuation elements laid down in the contracts, and is obtained from third party pricing agents, market makers or internal models. The unrealised appreciation/depreciation is disclosed in the Statement of Net Assets under "Unrealised gain/(loss) on volatility swaps" (see note 11 for details). Realised gains/(losses) and changes in unrealised appreciation/depreciation as a result thereof are included in the Statement of Operations and Changes in Net Assets respectively under "Net realised gain/(loss) on investments, derivatives and foreign currencies and other" and "Net change in unrealised appreciation/depreciation on volatility swaps" (disclosed at year end only).

(n) Inflation linked swaps

An inflation linked swap is a swap used to transfer inflation risk from one party to another through an exchange of cash flows. In an inflation linked swap, one party pays a fixed rate on a notional principal amount, while the other party pays a floating rate linked to an inflation index. Inflation linked swaps are marked to market at each NAV calculation date. The estimated market value is based on the valuation elements laid down in the contracts, and is obtained from third party pricing agents, market makers or internal models. The unrealised appreciation/depreciation is disclosed in the Statement of Net Assets under "Unrealised gain/(loss) on inflation linked swaps" (see note 12 for details). Realised gains/(losses) and changes in unrealised appreciation /depreciation as a result thereof are included in the Statement of Operations and Changes in Net Assets respectively under "Net realised gain/(loss) on investments, derivatives and foreign currencies and other" and "Net change in unrealised appreciation/depreciation on inflation linked swaps" (disclosed at year end only).

(o) Interest rate swaps

An interest rate swap is a bilateral agreement in which each of the parties agrees to exchange a series of interest payments for another series of payments (usually fixed/floating) based on a notional amount that serves as a computation basis and that is usually not exchanged. The interest rate swaps are marked to market daily based upon quotations from market makers and recorded in the Statement of Net Assets (see note 13 for details). The unrealized appreciation/depreciation is disclosed in the Statement of Net Assets under "Unrealised gain/(loss) on interest rate swaps" (see note 13 for details). Realised gains/(losses) and changes in unrealised appreciation/depreciation as a result thereof are included in the Statement of Operations and Changes in Net Assets respectively under "Net realised gain/(loss) on investments, derivatives and foreign currencies and other" and "Net change in unrealised appreciation/depreciation on interest rate swaps" (disclosed at year end only).

(p) Equity swaps

An equity swap is a derivative transaction in which the Fund and the counterparty enter into an agreement whereby one party pays the returns generated by an equity or a basket of equities. The other party pays interest based on the agreed notional amount of the transaction. The value of equity swap transactions is the net present value of all cash flows, both inflows and outflows. Equity swaps are recorded in the Statement of Net Assets (see note 14 for details). The unrealised appreciation/depreciation is disclosed in the Statement of Net Assets under "Unrealised gain/(loss) on equity swaps" (see note 14 for details). Realised gains/(losses) and changes in unrealised appreciation/depreciation as a result thereof are included in the Statement of Operations and Changes in Net Assets respectively under "Net realised gain/(loss) on investments, derivatives and foreign currencies and other" and "Net change in unrealised appreciation/depreciation on equity swaps" (disclosed at year end only).

(q) Commodity swaps

A commodity swap is similar to a Fixed-Floating interest rate swap. The difference is that in an interest rate swap the floating leg is based on standard interest rates such as LIBOR, EURIBOR etc. but in a commodity swap the floating leg is based on the price of underlying commodity index. No commodities are exchanged during the trade. Commodity swaps are marked-to-market using valuation sources/methods and the fair value is recorded on the Statement of Net Assets under "Unrealised gain/(loss) on commodity swaps" (see note 15 for details). The realised gains/(losses) and change in unrealised gains and losses are shown in the "Net realised gain/(loss) on investments, derivatives and foreign currencies and other" and the "Net change in unrealised appreciation/depreciation on commodity swaps" respectively in the Statement of Operations and Changes in Net Assets (disclosed at year end only).

(r) Total return swaps

A total return swap is a financial contract whereby one party agrees to pay another party the total return of a defined asset in return for receiving a floating rate return. The Fund enters into unfunded swap agreements on behalf of the particular sub-fund. Total return swaps are marked-to-market using valuation sources/methods and fair value is recorded in the Statement of Net Assets. Total return swap positions are valued using models which utilise observable data to the extent practicable and contain assumptions on the application of this data. Changes in data inputs and assumptions about these factors could affect the reported fair value of the total return swaps. The unrealised appreciation/depreciation is disclosed in the Statement of Net Assets under "Unrealised gain/(loss) on total return swaps" (see note 16 for details). Realised gains/(losses) and changes in unrealised appreciation/depreciation as a result thereof are included in the Statement of Operations and Changes in Net Assets respectively under "Net realised gain/(loss) on investments, derivatives and foreign currencies and other" and "Net change in unrealised appreciation/depreciation on total return swaps" (disclosed at year end only).

(s) Swaps on futures

The swaps on future is a financial contract whereby one party agrees to pay another party a fee or a premium depending on the underlying futures price at close compared to the underlying futures price at open and whether they are long or short. The Fund enters into unfunded swap agreements on behalf of the particular sub-fund. Swaps on futures are marked-to-market using valuation sources/methods and the fair value is recorded in the Statement of Net Assets. Swaps on future positions are valued using models which utilise observable data to the extent practicable and contain assumptions on the application of this data. Changes in data inputs and assumptions about these factors could affect the reported fair value of the swaps on future. The unrealised appreciation /depreciation is disclosed in the Statement of Net Assets under "Unrealised gain/(loss) on swaps on future". Realised gains/(losses) and changes in unrealised appreciation/depreciation as a result thereof are included in the Statement of Operations and Changes in Net Assets respectively under "Net realised gain/(loss) on investments, derivatives and foreign currencies and other" and "Net change in unrealised appreciation/depreciation on swaps on futures" (disclosed at year end only). There were Swaps on Futures held during the period ended 31 August 2020, however there were none held as at 31 August 2020.

(t) Options

A purchaser of a put option has the right, but not the obligation, to sell the underlying instrument at an agreed upon price ("strike price") to the option seller. A purchaser of a call option has the right, but not the obligation, to purchase the underlying instrument at the strike price from the option seller.

Purchased options - Premiums paid by the Fund for purchased options are included in the Statement of Net Assets as an investment. The option is adjusted daily to reflect the current market value of the option and the change is recorded as unrealised appreciation or depreciation. If the option is allowed to expire the Fund will lose the entire premium it paid and record a realised loss for the premium amount. Premiums paid for purchased options which are exercised or closed are added to the amounts paid or offset against the proceeds on the underlying investment transaction to determine the realised gain/loss or cost basis of the security.

Written options - Premiums received by the Fund for written options are included in the Statement of Net Assets. The amount of the liability is adjusted daily to reflect the current market value of the written option and the change in market value is recorded as unrealised appreciation or depreciation. Premiums received from written options that expire are treated as realised gains. The Fund records a realised gain or loss on written options based on whether the cost of the closing transaction exceeds the premium received. If a call option is exercised by the option buyer, the premium received by the Fund is added to the proceeds from the sale of the underlying security to the option buyer and compared to the cost of the closing transaction to determine whether there has been a realised gain or loss. If a put option is exercised by an option buyer, the premium received by the option seller reduces the cost basis of the purchased security. Written uncovered call options subject the Fund to unlimited risk of loss. Written covered call options limit the upside potential of a security above the strike price. Written put options subject the Fund to risk of loss if the value of the security declines below the exercise price minus the put premium.

Outstanding options traded on a regulated market are valued based on the closing price or the last available market price of the instruments. OTC options are marked to market based upon daily prices obtained from third party pricing agents and verified against the value from the counterparty. The unrealised gain/(loss) on options is included in the Statement of Net Assets (see note 17 for details).

The unrealised appreciation/depreciation is disclosed in the Statement of Net Assets under "Unrealised gain/(loss) on options/swaptions" (see note 17 for details). Realised gains/(losses) and changes in unrealised appreciation/depreciation as a result thereof are included in the Statement of Operations and Changes in Net Assets respectively under "Net realised gain/(loss) on investments, derivatives and foreign currencies and other" and "Net change in unrealised appreciation/depreciation on options/swaptions" (disclosed at year end only).

(u) Swaption

A swaption (swap option) is the option to enter into an interest rate swap or some other type of swap. In exchange for an option premium, the buyer gains the right but not the obligation to enter into a specified swap agreement with the issuer on a specified future date. There are two different kinds of swaptions: a payer swaption and a receiver swaption. In a payer swaption, the purchaser has the right, but not the obligation, to enter into a swap contract where he becomes the fixed-rate payer and the floating-rate receiver. A receiver swaption is the opposite; the purchaser has the option to enter into a swap contract where he will receive the fixed rate and pay the floating rate. The unrealised appreciation/depreciation is disclosed in the Statement of Net Assets under "Unrealised gain/(loss) on options/swaptions" (see note 17 for details). Realised gains/(losses) and changes in unrealised appreciation/depreciation as a result thereof are included in the Statement of Operations and Changes in Net Assets respectively under "Net realised gain/(loss) on investments, derivatives and foreign currencies and other" and "Net change in unrealised appreciation/depreciation on options/swaptions" (disclosed at year end only).

(v) Margin Accounts

Margin accounts represent the variation margin held at brokers for futures contracts, interest rate swaps, equity swaps and credit default swaps. Margin is only applicable to centrally cleared positions.

(w) Cross Investments

Cross sub-fund investment holdings were not eliminated from the combined figures. At 31 August 2020, the total cross sub-fund investment holdings on:

Invesco Bond Fund amounted to USD 4,430,571 into Invesco Active Multi-Sector Credit Fund.

Invesco Euro Bond Fund amounted to EUR 4,943,760 into Invesco Active Multi-Sector Credit Fund (USD equivalent (period end rate 1 USD=EUR 0.8388) is USD 5,893,563).

Invesco Euro Short Term Bond Fund amounted to EUR 1,677,453 into Invesco Active Multi-Sector Credit Fund (USD equivalent (period end rate 1 USD=EUR 0.8388) is USD 1,999,728).

Invesco Global High Income Fund amounted to USD 11,324,106 into Invesco Active Multi-Sector Credit Fund.

Invesco Real Return (EUR) Bond Fund amounted to EUR 408,518 into Invesco Active Multi-Sector Credit Fund (USD equivalent (period end rate 1 USD=EUR 0.8388) is USD 487,003).

Invesco Global Moderate Allocation Fund amounted to USD 142,222 into Invesco Active Multi-Sector Credit Fund.

Invesco Global Targeted Returns Fund amounted to EUR 515,267 into Invesco India All-Cap Equity Fund (USD equivalent (period end rate 1 USD=EUR 0.8388) is USD 614,261).

Invesco Global Targeted Returns Select Fund amounted to EUR 177,147 into Invesco India All-Cap Equity Fund (USD equivalent (period end rate 1 USD=EUR 0.8388) is USD 211,180).

Therefore the Total Combined Net Assets at period end, if these cross investment holdings were eliminated would have amounted to USD 52,333,409,134.

(x) Capital gains tax on investment

Indian Capital Gains Tax:

The India Finance Bill, 2018 introduced a 10% tax (plus surcharge and cess) on long term capital gains from the disposal of Indian listed securities with effect from 1 April 2018. Prior to this, long term capital gains were exempt from tax in India provided securities transaction tax had been paid. Short term gains continue to be subject to tax of 15% (plus surcharge and cess).

(y) Other debtors/Other creditors

The Other debtors line on the Statement of Financial Position can include prepaid sundry fees, accrued income and prepayments.

The Other creditors line on the Statement of Financial Position can include distributions payable, management fees payable, accrued expenses, accrued capital gains tax payable and accrued sundry fees.

3. Management and Investment Manager Fees

The Directors of the Fund (the "Directors") are responsible for the investment policy, management and administration of the Fund. The Directors delegate the day-to-day investment management of the securities portfolio of the Fund to Invesco Management S.A. (the "Management Company").

In following the investment policy, the Management Company has delegated the investment management services, as appropriate, to Invesco Advisers Inc. in the United States, Invesco Asset Management Deutschland GmbH in Germany, Invesco Asset Management Limited in the United Kingdom, Invesco Canada Ltd. and Invesco Hong Kong Limited. Each such investment manager may then in turn have sub-delegated the investment management services to any of the aforementioned entities, Invesco Asset Management (Japan) Limited or Invesco Asset Management Singapore Ltd.

5. Tax Status

The Fund is registered under Luxembourg law as a collective investment undertaking. Accordingly, no Luxembourg income or capital gains tax is at present payable by the Fund. It is, however, subject to an annual "taxe d'abonnement" calculated at an annual rate of 0.05% of the Net Asset Value. "I" and "S" share classes are subject to a reduced annual rate of 0.01% of the Net Asset Value, such tax being payable quarterly on the basis of the Net Asset Value of the sub-funds at the end of the relevant quarter.

Further to a number of rulings of the European Court of Justice regarding taxation withheld on overseas dividends, the Management Company has taken steps to make claims with certain European Tax Authorities for repayment of taxation suffered on foreign dividend income. Due to the uncertainty regarding the likely success of the claims, it is not possible to estimate the potential amount of overseas withholding tax that may be received and these are recorded on cash basis.

No subscription tax is held on underlying Luxembourg funds already submitted to "Taxe d'abonnement".

6. Dividends

18. Swing Pricing Policy

Securities are valued as outlined in note 2(b). However, in order to mitigate the effects of dilution, the Fund has implemented a policy of "Swing Pricing" as from December 18, 2007. The Swing Pricing mechanism may be applied against all sub-funds of the Invesco Funds.

In the best interest of Shareholders, the Directors may allow for the Net Asset Value to be adjusted, using bid or ask market quotation rather than mid, depending on the net share activity arising from subscriptions, redemptions or switching in a sub-fund for a given business day.

The sub-funds operate partial swing only. That is, the sub-funds will not swing to either a bid or ask price basis daily, but only when a pre-determined level of shareholder activity is exceeded. In such circumstances the NAV of the relevant sub-fund may be adjusted by an amount not exceeding 2.00%. High redemption level triggers a swing to a bid price basis, whereas high subscription level triggers a swing to ask price basis. The Directors have the ability to place a sub-fund on constant swing depending on the recent trends in a sub-fund.

The reconciliation on 31 August 2020 of MID to BID/ASK pricing is as follows:
