iShares Global Clean Energy UCITS ETF

A sub-fund of iShares II plc

USD (Dist) Share Class

ISIN: IE00B1XNHC34

Exchange Traded Fund (ETF)

Manager: BlackRock Asset Management Ireland Limited

Objectives and Investment Policy

- ▶ The Share Class is a share class of a Fund which aims to achieve a return on your investment, through a combination of capital growth and income on the Fund's assets, which reflects the return of the S&P Global Clean Energy Index, the Fund's benchmark index (Index).
- ▶ The Share Class, via the Fund, is passively managed and aims to invest so far as possible and practicable in the equity securities (e.g. shares) that make up the Index.
- ▶ The Index measures the performance of approximately 100 of the largest, publicly traded companies within the global clean energy business that meet specific investability requirements and the index provider's environmental, social and governance ("ESG") exclusionary criteria. The Index is designed to provide exposure to the leading publicly listed companies in the global clean energy business, from both developed and emerging markets. Liquid means that the equity securities that make up the Index can be easily be bought or sold in the market in normal market conditions. The Index comprises a diversified mix of clean energy production and clean energy equipment & technology companies. The Index is weighted by market capitalisation. Market capitalisation is the share price of the company multiplied by the number of shares issued.
- ▶ Companies may be excluded from the Index if they are involved with controversial weapons, small arms, military contracting, tobacco, thermal coal, oil sands, shale energy, arctic oil and gas exploration. Companies that are classified as violating United Nations Global Compact principles or have been assessed by the index provider's ESG principles (which measure a company's involvement in severe ESG controversies, or exposure to and management of ESG risks, or a combination of a company's ESG risk and controversy ratings) are also excluded.
- ▶ The Fund may obtain limited exposure to securities not considered to satisfy these ESG criteria.
- ▶ The Fund intends to replicate the Index by holding the equity securities, which make up the Index, in similar proportions to it.
- ▶ The Fund may also engage in short-term secured lending of its investments to certain eligible third parties to generate additional income to off-set the costs of the Fund.
- ▶ The investment manager may use financial derivative instruments (FDIs) (i.e. investments the prices of which are based on one or more underlying assets) to help achieve the Fund's investment objective. FDIs may be used for direct investment purposes. The use of FDIs is expected to be limited for this Share Class.
- ▶ The Fund adopts a best-in-universe approach to sustainable investing, meaning it is expected to invest in the best issuers from an ESG perspective (based on the ESG criteria of the Index) within the relevant universe covered by the Index.
- ▶ Recommendation: This Fund is suitable for medium to long term investment, though the Fund may also be suitable for shorter term exposure to the Index.
- ▶ Your shares will be distributing shares (i.e. dividend income will be paid on the shares semi-annually).
- ▶ Your shares will be denominated in US Dollar, the Fund's base currency.
- ▶ The shares are listed on one or more stock exchanges and may be traded in currencies other than their base currency. The performance of your shares may be affected by this currency difference. In normal circumstances, only authorised participants (e.g. select financial institutions) may deal in shares (or interests in shares) directly with the Fund. Other investors can deal in shares (or interests in shares) daily through an intermediary on stock exchange (s) on which the shares are traded.

Risk and Reward Profile

- ▶ This indicator is based on historical data and may not be a reliable indication of the future risk profile of this Share Class.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Share Class is rated seven due to the nature of its investments which include the risks listed below. These factors may impact the value of the Share Class or expose the Share Class to losses.

- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- Investments in the Global Clean Energy industry are subject to environmental or sustainability concerns, taxes, government regulation, price, supply and competition.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Share Class to financial loss.

Charges

The charges are used to pay the costs of running the Share Class, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

*Not applicable to secondary market investors. Investors dealing on a stock exchange will pay fees charged by their stock brokers. Such charges are publicly available on exchanges on which the shares are listed and traded, or can be obtained from stock brokers.

*Authorised participants dealing directly with the Fund will pay related transaction costs including, on redemptions, any applicable capital gains tax (CGT) and other taxes on underlying securities.

The ongoing charges figure is based on the fixed annualised fee charged to the Share Class in accordance with the Fund's prospectus. This figure excludes portfolio trade related costs, except costs paid to the depositary and any entry/exit charge paid to an underlying collective investment scheme (if any).

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.
