a sub-fund of UBS (Lux) Medium Term Bond Fund

This subfund is managed by UBS Fund Management (Luxembourg) S.A.(the "Management Company").

Objectives and investment policy

The fund invests mainly in government, quasi-government, collateralized and corporate bonds in the fund's currency with maximum terms of 10 years, whereby the average residual term of the portfolio is no greater than six years. The portfolio duration is around 2.5 years, which is similar to the 1-5-year index.

The fund manager combines various carefully selected issuers and securities with different terms with the objective of exploiting interesting earnings opportunities and in doing so keeping the level of risk under control.

In principle, investors may ask the Management Company to redeem their units on any business day in Luxembourg.

Income of this share class is reinvested.

Risk and reward profile

More about the risk category

- The risk category is based on the estimated future volatility of the fund. The method used for this estimate depends on the fund type and historical data.
- Historical performance is not a reliable indicator for future performance.
- The risk category allocated is not static and may vary over time.
- Allocation to the lowest risk category does not mean that an investment in this fund is free of risk.

Why is the fund in this category?

- The fund is in risk category 2 because the volatility of its returns is very low.
The fund invests in bonds and may therefore be subject to volatility. This requires corresponding risk tolerance and capacity. The value of a unit may fall below the purchase price. Changes in interest rates have an effect on the value of the portfolio.

Further material risks

- Investment grade bonds are usually considered as carrying low to medium credit risk (i.e. potential loss due to failure of issuer).
- Investment in fixed income securities are usually considered as carrying credit risk (i.e. potential loss due to failure of issuer).
- The fund can invest in less liquid assets that may be difficult to sell in distressed markets.
- The fund may use derivatives which can reduce investor risks or give rise to market risks as well as potential loss due to failure of counterparty
- Every fund reveals specific risks, a detailed and comprehensive list of risk descriptions can be found in the prospectus.
